Score Distribution

Science 7 – Quarter 1 Quiz

CLASS	LEARNING AREA	TERM · SCORE COLUMN
Grade 7 – Sampaguita (Simple scorebook)	**Science**	**TERM1 · WW1**
NUMBER OF ITEMS	LEARNERS TESTED	SCHOOL YEAR
20	**1**	**2026–2027**
PAPERS CHECKED	DATE OF REPORT	
October 24, 2026	**October 24, 2026**	

I. Distribution of Scores

Table 1. Descriptive Statistics of the Scores

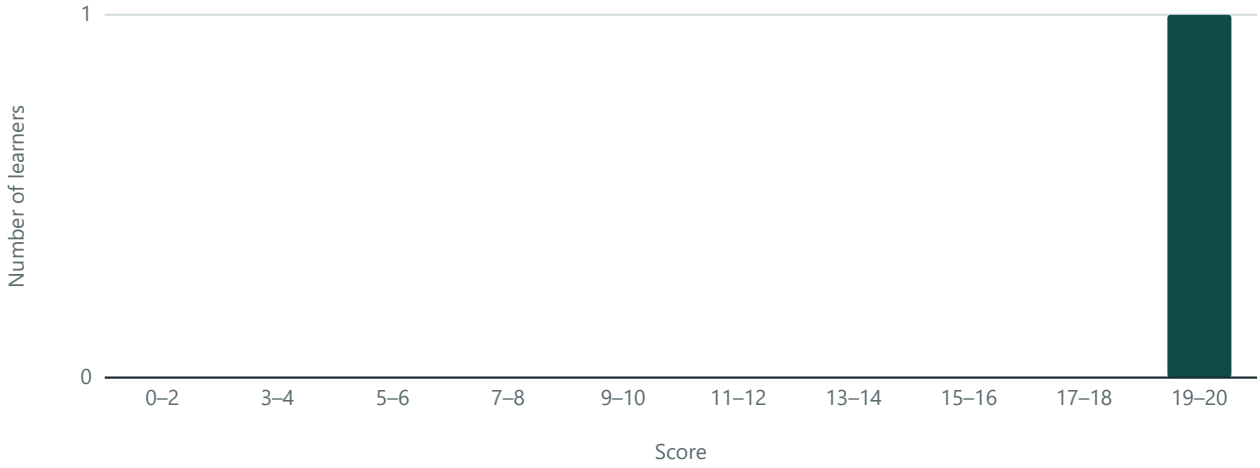

Measure	Value
Number of learners (N)	1
Mean	19.00
Median	19.00
Mode	19
Standard deviation	0.00
Lowest score	19
Highest score	19
Range	0
Coefficient of skewness	0.00 (approximately symmetrical)

Table 2. Frequency Distribution of the Scores

Score Interval	Frequency	Percentage	Cumulative Frequency
19–20	1	100.00	1
17–18	0	0.00	0
15–16	0	0.00	0
13–14	0	0.00	0
11–12	0	0.00	0
9–10	0	0.00	0
7–8	0	0.00	0

Score Interval	Frequency	Percentage	Cumulative Frequency
5–6	0	0.00	0
3–4	0	0.00	0
0–2	0	0.00	0
Total	**1**	**100.00**	

Figure 1. Frequency Distribution of the Scores

Interpretation

Scores ranged from 19 to 19, a range of 0 points. The median score is 19.00, which means half of the learners scored 19.00 or lower, while the mean is 19.00 (SD = 0.00). The largest number of learners, 1 (100.00%), scored between 19 and 20.

The distribution is approximately symmetrical (Pearson's coefficient of skewness = 0.00): scores are spread fairly evenly around the average.

Notes on Computation

- Score intervals have equal width (highest possible score ÷ 10, rounded up); a score of 0 is counted in the lowest interval.
- Skewness uses Pearson's coefficient, 3 × (mean − median) ÷ SD; values within ±0.5 are read as approximately symmetrical (Standard test-construction practice).
- This report records results only; it does not compute or replace grades.
