Science 7 – Quarter 1 Quiz

CLASS	LEARNING AREA	TERM · SCORE COLUMN
Grade 7 – Sampaguita (Simple scorebook)	**Science**	**TERM1 · WW1**
NUMBER OF ITEMS	LEARNERS TESTED	SCHOOL YEAR
20	**1**	**2026–2027**
PAPERS CHECKED	DATE OF REPORT	
October 21, 2026	**October 21, 2026**	

I. Summary of Learner Performance

Table 1. Mean, Standard Deviation, and Mean Percentage Score of the Learners

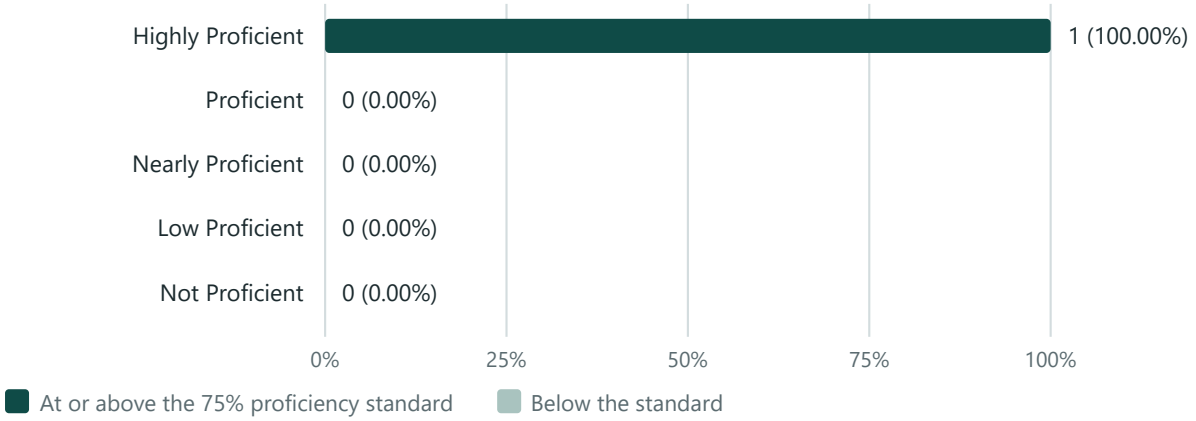

Group	N	Mean	SD	MPS	Highest	Lowest	Proficiency Level
All learners	1	19.00	0.00	95.00	19	19	Highly Proficient

Note. N = number of learners. MPS = (mean ÷ number of items) × 100. SD = population standard deviation. Proficiency levels follow the DepEd National Achievement Test criteria.

Table 2. Distribution of Learners by Proficiency Level

Proficiency Level	Score Range (%)	Frequency	Percentage
Highly Proficient	90–100	1	100.00
Proficient	75–89	0	0.00
Nearly Proficient	50–74	0	0.00
Low Proficient	25–49	0	0.00
Not Proficient	0–24	0	0.00
Total		**1**	**100.00**

Figure 1. Percentage of Learners at Each Proficiency Level

Interpretation

A total of 1 learner took the 20-item Science 7 – Quarter 1 Quiz. The class obtained a mean score of 19.00 (SD = 0.00) and a mean percentage score (MPS) of 95.00, which is at the Highly Proficient level. Individual scores ranged from 19 to 19.

Of the 1 learner, 1 (100.00%) reached the Proficient level or higher, meeting the 75 percent standard; and no learner scored below 50 percent. The largest group of learners is at the Highly Proficient level.

Recommendations

1. Sustain the teaching strategies used for this unit, since the class MPS of 95.00 meets the 75 percent proficiency standard.
2. Provide enrichment activities for the 1 Highly Proficient learner.

II. Learner Proficiency

Table 3. Scores and Proficiency Levels of the Learners, Ranked

Rank	Learner	Score	Percentage	Proficiency Level
1	CRUZ, Paolo	19	95.00	Highly Proficient

Note. Scores are out of 20 items. Percentage = score ÷ highest possible score × 100.

Table 4. Learners Scoring Below 50 Percent (Priority for Intervention)

No learner scored below 50 percent.

Interpretation

Learners are ranked from the highest to the lowest score. The highest score, 19 (95.00%), was obtained by CRUZ, Paolo, and the lowest score, 19 (95.00%), by CRUZ, Paolo.

No learner scored below 50 percent, so no learner is listed for priority intervention.

III. Distribution of Scores

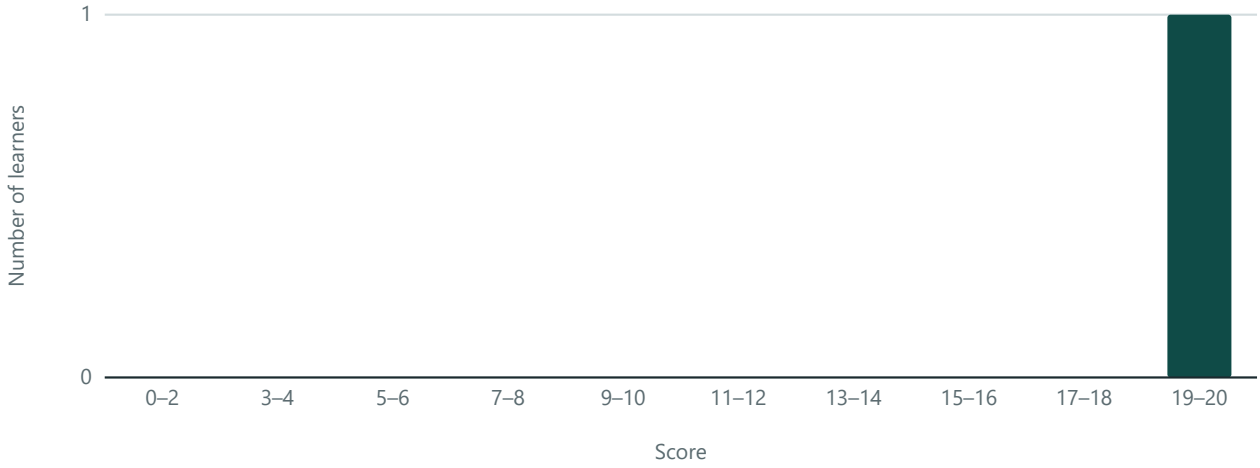

Table 5. Descriptive Statistics of the Scores

Measure	Value
Number of learners (N)	1
Mean	19.00
Median	19.00
Mode	19
Standard deviation	0.00
Lowest score	19
Highest score	19
Range	0
Coefficient of skewness	0.00 (approximately symmetrical)

Table 6. Frequency Distribution of the Scores

Score Interval	Frequency	Percentage	Cumulative Frequency
19–20	1	100.00	1
17–18	0	0.00	0
15–16	0	0.00	0
13–14	0	0.00	0
11–12	0	0.00	0
9–10	0	0.00	0
7–8	0	0.00	0
5–6	0	0.00	0
3–4	0	0.00	0
0–2	0	0.00	0
Total	**1**	**100.00**	

Figure 2. Frequency Distribution of the Scores

Interpretation

Scores ranged from 19 to 19, a range of 0 points. The median score is 19.00, which means half of the learners scored 19.00 or lower, while the mean is 19.00 (SD = 0.00). The largest number of learners, 1 (100.00%), scored between 19 and 20.

The distribution is approximately symmetrical (Pearson's coefficient of skewness = 0.00): scores are spread fairly evenly around the average.

IV. Item Analysis

Table 7. Summary of Item Statistics

Measure	Value
Reliability (KR-20)	Not computable
Upper and lower groups (27% each)	1 learner each
Items rated Very Easy	19
Items rated Easy	0
Items rated Average	0
Items rated Difficult	0
Items rated Very Difficult	1
Items to retain	0
Items to revise	0
Items to reject	20

Note. Fewer than 20 learners took the test, so the discrimination indices rest on small groups and should be read with caution.

Table 8. Difficulty Index, Discrimination Index, and Decision per Item

Item	Key	Correct (f)	p	Difficulty	D	Discrimination	Decision	Most Chosen Wrong Option
1	B	1	1.00	Very Easy	0.00	Poor	**Reject**	—
2	D	1	1.00	Very Easy	0.00	Poor	**Reject**	—
3	A	1	1.00	Very Easy	0.00	Poor	**Reject**	—
4	C	1	1.00	Very Easy	0.00	Poor	**Reject**	—
5	C	1	1.00	Very Easy	0.00	Poor	**Reject**	—
6	A	1	1.00	Very Easy	0.00	Poor	**Reject**	—
7	B	1	1.00	Very Easy	0.00	Poor	**Reject**	—
8	D	1	1.00	Very Easy	0.00	Poor	**Reject**	—
9	B	1	1.00	Very Easy	0.00	Poor	**Reject**	—
10	A	1	1.00	Very Easy	0.00	Poor	**Reject**	—
11	D	1	1.00	Very Easy	0.00	Poor	**Reject**	—
12	C	0	0.00	Very Difficult	0.00	Poor	**Reject**	D (1)
13	C	1	1.00	Very Easy	0.00	Poor	**Reject**	—
14	B	1	1.00	Very Easy	0.00	Poor	**Reject**	—
15	A	1	1.00	Very Easy	0.00	Poor	**Reject**	—
16	D	1	1.00	Very Easy	0.00	Poor	**Reject**	—
17	B	1	1.00	Very Easy	0.00	Poor	**Reject**	—
18	C	1	1.00	Very Easy	0.00	Poor	**Reject**	—
19	A	1	1.00	Very Easy	0.00	Poor	**Reject**	—
20	D	1	1.00	Very Easy	0.00	Poor	**Reject**	—

Note. p = difficulty index; D = discrimination index. Correct (f) = number of learners who answered correctly.

Figure 3. Percentage of Learners Answering Each Item Correctly

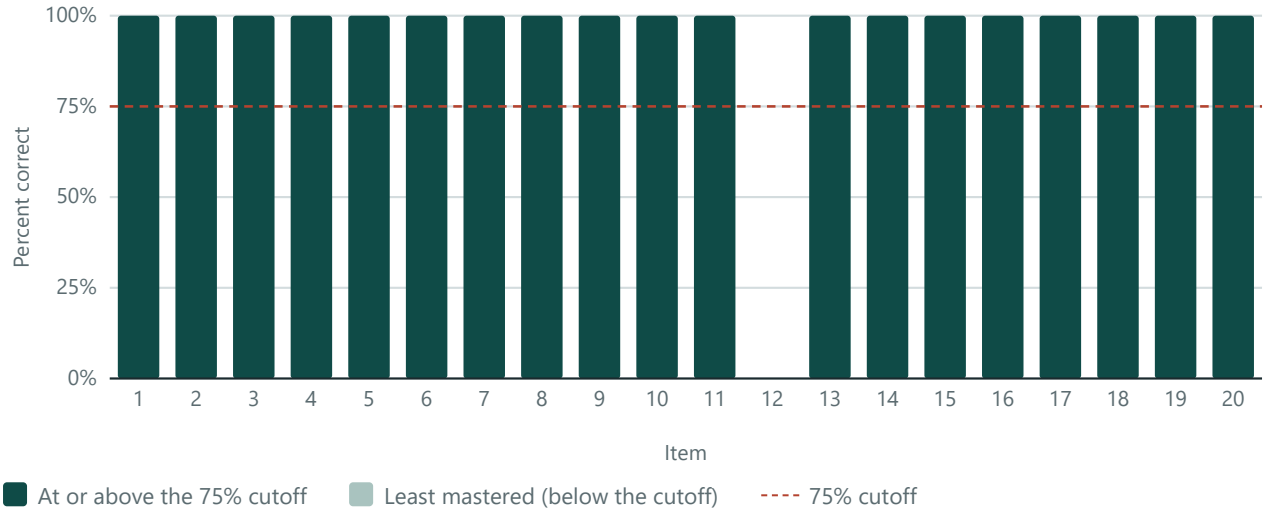

Table 9. Least Mastered Items (Below 75 Percent)

Rank	Item	Correct (f)	Percentage	Mastery Level
1	12	0	0.00	Absolutely No Mastery

Table 10. Most Mastered Items

Item	Correct (f)	Percentage	Mastery Level
1	1	100.00	Mastered
2	1	100.00	Mastered
3	1	100.00	Mastered
4	1	100.00	Mastered
5	1	100.00	Mastered
6	1	100.00	Mastered
7	1	100.00	Mastered
8	1	100.00	Mastered
9	1	100.00	Mastered
10	1	100.00	Mastered

Interpretation

The reliability of the test could not be computed because every learner obtained the same score.

In terms of difficulty, the 20 items are 19 very easy and 1 very difficult. Based on both the difficulty and discrimination indices, 0 can be retained, 0 should be revised and 20 should be rejected.

Using the 75 percent cutoff, 1 of the 20 items are least mastered: items 12.

Because only 1 learner took the test, each 27 percent group holds 1 learner; read the discrimination indices with caution.

Recommendations

1. Reteach the competencies measured by the least mastered items (items 12) before the next assessment.
2. Rewrite or replace the 20 items marked Revise or Reject before this test is used again, and keep the items marked Retain for the item bank.

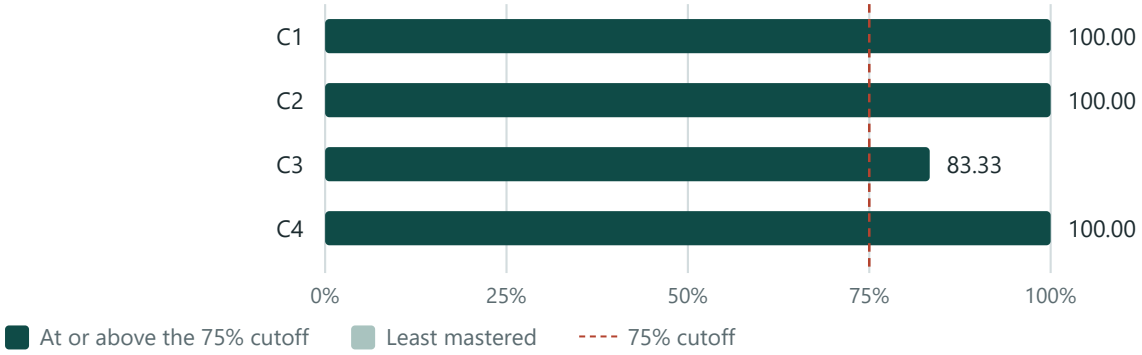

V. Mastery of Competencies

Table 11. Mean Percentage Score and Mastery Level per Competency, Least Mastered First

Rank	Ref.	Competency	Items	MPS	Mastery Level	Learners Below Cutoff	Remark
1	C3	Pure substances and mixtures (S7MT-Ic-3)	11–16	83.33	Moving Towards Mastery	0	—
2	C1	Scientific investigation (S7MT-Ia-1)	1–4	100.00	Mastered	0	—
3	C2	Properties of solutions (S7MT-Ib-2)	5–10	100.00	Mastered	0	—
4	C4	Acids and bases (S7MT-Id-4)	17–20	100.00	Mastered	0	—

Note. MPS per competency uses only its own items. Mastery levels follow the DepEd National Achievement Test criteria. Least mastered = below 75 percent.

Figure 4. Mean Percentage Score per Competency

Interpretation

Of the 4 competencies assessed, 0 fell below the 75 percent cutoff and are considered least mastered.

The lowest is Pure substances and mixtures (C3) with an MPS of 83.33, described as Moving Towards Mastery; 0 of the 1 learner scored below the cutoff on it.

The highest is Acids and bases (C4) with an MPS of 100.00, described as Mastered.

Recommendations

1. Proceed to the next competencies, since every competency assessed reached the 75 percent cutoff, and provide enrichment for proficient learners.
2. Use the learner competency matrix to group learners by the competencies they missed.

VI. Table of Specifications

Table 12. Table of Specifications

No.	Competency	Code	Days Taught	Weight (%)	No. of Items	Item Placement
1	Scientific investigation	S7MT-Ia-1	2	20.00	4	1–4
2	Properties of solutions	S7MT-Ib-2	3	30.00	6	5–10
3	Pure substances and mixtures	S7MT-Ic-3	3	30.00	6	11–16
4	Acids and bases	S7MT-Id-4	2	20.00	4	17–20
	Total		**10**	**100.00**	**20**	

Note. No. of items = (days taught ÷ total days) × 20 items.

VII. Learner Competency Matrix

C1 Scientific investigation (items 1–4)

C2 Properties of solutions (items 5–10)

C3 Pure substances and mixtures (items 11–16)

C4 Acids and bases (items 17–20)

Table 13. Percentage of Each Competency's Items Answered Correctly, per Learner

Learner	Overall (%)	C1	C2	C3	C4	Below Cutoff
CRUZ, Paolo	95.00	100	100	83	100	0

Note. Shaded cells are below the 75 percent cutoff. Cell values are rounded to whole percentages.

Interpretation

Each cell shows the percentage of a competency's items that the learner answered correctly; cells below 75 percent are shaded.

Of the 1 learner, 0 (0.00%) scored below the cutoff in at least one competency.

Notes on Computation

- Mean Percentage Score (MPS) = (mean score ÷ highest possible score) × 100, reported to two decimal places. The highest possible score is the number of items when every item is worth 1 point.
- Proficiency levels (DepEd National Achievement Test criteria): 90–100 Highly Proficient; 75–89 Proficient; 50–74 Nearly Proficient; 25–49 Low Proficient; 0–24 Not Proficient. A percentage is placed by the lower bound of its range, so 74.50 is Nearly Proficient.
- Standard deviation (SD) is computed over all learners tested (population SD).
- Learners with equal scores share a rank (1, 2, 2, 4).
- Score intervals have equal width (highest possible score ÷ 10, rounded up); a score of 0 is counted in the lowest interval.
- Skewness uses Pearson's coefficient, 3 × (mean − median) ÷ SD; values within ±0.5 are read as approximately symmetrical (Standard test-construction practice).
- Difficulty index (p) = learners who answered the item correctly ÷ all learners.
- Discrimination index (D) = (correct in the upper 27% − correct in the lower 27%) ÷ learners in one group (DepEd National Achievement Test criteria).
- Readings of p (0.81–1.00 Very Easy; 0.61–0.80 Easy; 0.41–0.60 Average; 0.21–0.40 Difficult; 0.00–0.20 Very Difficult), of D (0.40 and above Very Good; 0.30–0.39 Good; 0.20–0.29 Fair; below 0.20 Poor) and the decision (Retain when both are acceptable, Revise when one is, Reject when neither) follow standard test-construction practice.
- Reliability uses the Kuder-Richardson Formula 20 (KR-20). The upper and lower groups and KR-20 count correct answers, one per item, even when items carry different points.
- Mastery of an item uses the DepEd National Achievement Test criteria: 96–100 Mastered; 86–95 Closely Approximating Mastery; 66–85 Moving Towards Mastery; 35–65 Average Mastery; 15–34 Low Mastery; 5–14 Very Low Mastery; 0–4 Absolutely No Mastery.
- A competency's MPS uses only the items assigned to it in the Table of Specifications: correct answers on those items ÷ (its items × learners) × 100.
- A competency below 75 percent is listed as least mastered (the cutoff is set in Settings).
- Items per competency = (days taught ÷ total days) × total items, with remainders given to the largest fractions so the column always totals the number of items.
- Each cell = the learner's correct answers on that competency's items ÷ its items × 100.
- This report records results only; it does not compute or replace grades.
